## 1. AUDIT REPORT

A gender audit is the process of assessing policies, programs, and procedures in an organization to identify gender biases and determine how equally women and men are treated and represented.

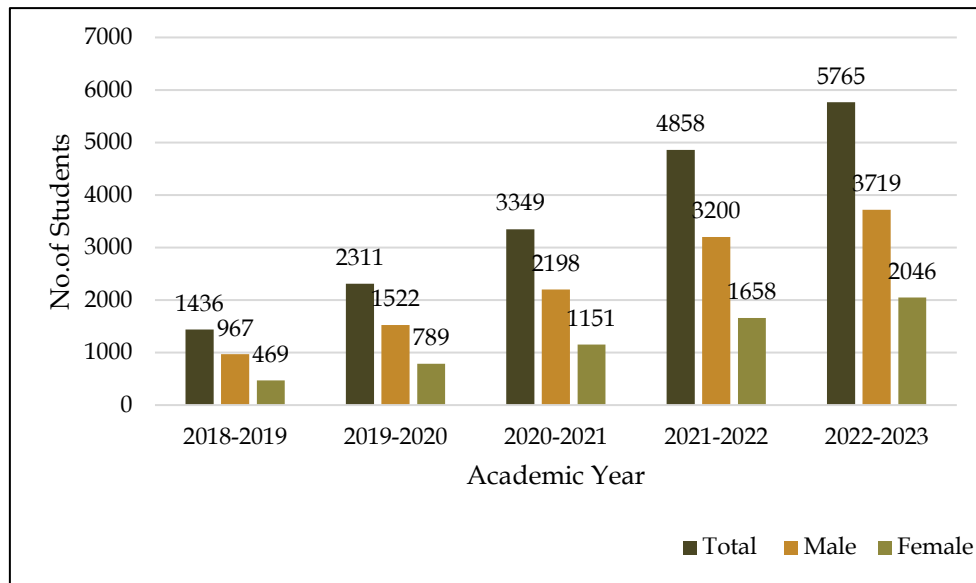

**Internal Quality Assurance Cell (IQAC)** at our institution conducted a gender audit to assess gender equality and inclusivity on campus. The audit examined policies, practices, and facilities from a gender perspective. It looked at aspects such as admissions, curriculum, recruitment, organizational culture, safety and security, facilities, and support systems through a gender lens. The aim was to identify gaps in order to recommend measures to promote gender justice and create an enabling environment for all genders. The IQAC will follow up by working with various stakeholders to implement the recommendations over a period, thereby enhancing gender equity and accountability on campus. Regular gender audits by the IQAC will help assess progress and drive positive change.

### **Gender balance within the Institution**

Gender balance refers to maintaining an equitable proportion of male and female representation within the institution, both among the student body in various programs and within the staff structure. The underlying principle is rooted in the acknowledgment that, historically, women have faced limited access to resources and opportunities due to societal structures acting as barriers. This disparity leads to reduced capabilities among women, creating a cascading impact on their empowerment and access to developmental initiatives.
